

Commercial MEPAS (Mersey Estuary Pollution Alleviation Scheme)

Brief Description

Construct a series of sewage pumping station stations along the banks of the river Mersey from Garston Dock to Bootle.

Start Date:	May 2008
Completion Date:	Sept 2009
Value:	£1 million
Contract Period:	60 weeks
HHS Role:	Main Contractor
Client:	Miller Construction
Site Manager:	Bob Kimmins
Contract Manager:	Rob Smith
Architect:	Miller Construction
Quantity Surveyor:	Miller Construction

Key Points to note:

Following the successful conclusion of this contract we went on to work with Miller Construction on water treatment plants at Minworth and Stourbridge in the Midlands.

Challenges:

Construction of the buildings was very individualistic with stone quoins, corbels and verges with traditional slate roofing.
